

The Special Needs Registry has been developed for residents with special functional needs, disabilities, chronic conditions and other healthcare needs who may require assistance before, during, or after an emergency.

The office of Delaware County Special Needs Emergency Preparedness Program has developed a Special Needs Registry for residents with special functional needs, disabilities, chronic conditions and other healthcare needs who may require assistance before, during, or after an emergency.

This registration allows residents with special needs an opportunity to provide information to emergency response agencies so those agencies can better plan to serve them in a disaster or other emergencies.

The information collected will not be available to the public, and is protected by HIPAA privacy rules. It will only be shared with emergency response agencies to improve their ability to serve.

In order to comply with HIPAA regulations we need to have a signed release form on file as part of the registration process.

For more information on the registration process, please email or call your Support Administrator or your Early Intervention specialist at DCBDD. They will help you complete the registration process.
